

Drawn Wire

Compliant with AS/NZS 4671: 2001 Steel Reinforcing Materials
TMR Registered Supplier

Product Information

Drawn wire is a product typically used to produce reinforcing steel mesh, but it can also be used when producing precast concrete slabs and prefabricated steel reinforcing cages.

Other uses include to produce dowel jointing systems or to create ligatures to secure sections of reinforcing steel together.

It can be either ordered by the spool for use in a manufacturing environment, or in straight lengths specified by the customer or engineer.

Common Stock Spools of Drawn Wire

Product Code	Wire Size (mm)	Weight
DW6.75SP2	6.75	3t
DW7.6SP2	7.6	3t
DW8.6SP2	8.6	3t
DW9.5SP2	9.5	3t
DW10.65SP2	10.65	3t
DW11.9SP2	11.9	3t
