

Galvanised Mesh

Compliant with AS/NZS 4671: 2001 Steel Reinforcing Materials

TMR Registered Supplier

Product Information

Galvanised Steel mesh is designed to be used in applications which may be exposed to weather since the hot-dipped galvanising makes the steel mesh highly resistant to corrosion.

The galvanised mesh is often used in situations when there is a higher chance for the steel mesh to be exposed to the elements and corrode. The galvanised layer protects the integrity of the reinforcing mesh.

Stock Galvanised Mesh

Product Code	Size (mm)	Spacings (mm)	Weight (kg)
NF62G	6000 x 2400	200 x 200	33 kg
NF72G	6000 x 2400	200 x 200	41 kg
NF82G	6000 x 2400	200 x 200	52 kg
