

Galvanised Reinforcing Bar

Compliant with AS/NZS 4671: 2001 Steel Reinforcing Materials
TMR Registered Supplier

Product Information

In stock, is a range of Galvanised bar. Both N grade 500MPa Reinforcing Bar (D500N) and R grade 250MPa Round Reinforcing Bar (R250N).

Stock lengths can be supplied off the shelf and also processed (cut, bent, threaded) in a variety of shapes and sizes to suit your specific requirements with a cold zinc spray on the cut/bent area.

Custom sizes and lengths can be processed as black bar and then sent to a 3rd party to be hot-dipped galvanised for the most reliable finish.
