

Round Reinforcing Bar

Compliant with AS/NZS 4671: 2001 Steel Reinforcing Materials
TMR Registered Supplier

Product Information

Round reinforcing steel bar is a useful product for many residential, commercial, and infrastructure building projects. It's most common use is as a dowel between an existing slab and a newly poured slab to ensure the structural integrity is present throughout the entire slab.

They can also be used as ligatures and spirals. These are often present within footings, piers, columns, partitions and precast concrete sections.

Stock Round Straight Bar

| Product Code | Diameter | Length |
|--------------|----------|--------|
| R10/6 | 10mm | 6000mm |
| R12/6 | 12mm | 6000mm |
| R16/6 | 16mm | 6000mm |
| R20/6 | 20mm | 6000mm |
| R24/6 | 24mm | 6000mm |

| Product Code | Diameter | Length |
|--------------|----------|--------|
| R27/6 | 27mm | 6000mm |
| R30/6 | 30mm | 6000mm |
| R33/6 | 33mm | 6000mm |
| R36/6 | 36mm | 6000mm |
| R39/6 | 39mm | 6000mm |
