

CCS Hardseal Advanced

A ready to use, solvent based, general-purpose gloss acrylic sealer, formulated to protect and enhance the surface of plain, coloured, stamped, stencilled and sprayed concrete.

The solution provides an extremely hard film of limited flexibility with excellent resistance to tyre marking, sunlight, grease and oil.

CCS Hi-Build Enduro

A high solids, ready to use, solvent based, premium strength acrylic sealer, formulated to protect and enhance the surface of plain, coloured, stamped, stencilled and sprayed concrete and textured concrete pavers.

The solution provides a longer lasting gloss film of limited flexibility with excellent resistance to tyre marking, sunlight, grease and oil. Also available as Hi-Build Enduro Matt which provides for a satin finish.

CCS Same Day Sealer

A ready to use specially modified resin and solvent based acrylic sealer, designed for same day application to freshly poured concrete. The high resin content

acts as a skin to help slow the moisture loss from the slab, and in so doing, enhance the strength of the concrete.

CCS Colour Master Sealer

A clear, solvent based acrylic resin available in 12 colours, specially formulated to be mixed with CCS Colour Master Tint – a two litre colour pack of colour-fast iron oxide pigments.

When both parts are mixed thoroughly they create a long lasting gloss opaque colour finish over concrete surfaces.

CCS Alfresco Seal WB

A water-based, single component, cross linking emulsion designed to protect and enhance concrete surfaces internally and externally. CCS Alfresco Seal WB can be used over solvent based acrylic

coatings as a re-coating sealer as long as the old solvent based sealer is in good condition. CCS Alfresco Seal WB is classified as a low VOC (Green Star compliant) sealer.
