

NEUMANN STEEL
REINFORCING

Galvanised Steel Dowels

Made in Australia
Available in stock
Resistant to environmental degradation
Allow for movement with temperature changes

Galvanised Steel Dowels are recommended where the dowels will be subjected to harsher environmental conditions. Galvanising provides better protection from the elements, and their smooth surface means that they can move and shift as a result of changes in the environment.

Stock Sizes

Product Code	Bar Diameter (mm)	Length (mm)
