

NEUMANN STEEL
REINFORCING

Round Reinforcing Bar

Made in Australia
Compliant with AS/NZS 4671:2019
Thread-less circular bars
Forms a spiral easier than deformed bar
Allows movement in slab, preventing cracking

The most common use for Round Reinforcing Steel Bar is as a dowel between an existing slab and a newly poured slab to ensure the structural integrity is present throughout the entire slab.

It can also be used to make ligatures and spirals and they are often present within footings, piers, columns, partitions and precast concrete sections.

Stock Sizes

Product Code	Diameter (mm)	Length (mm)
R10/6	10	6,000
R16/6	12	6,000
R16/6	16	6,000
R20/6	20	6,000
R24/6	24	6,000
R27/6	27	6,000
R30/6	30	6,000
R33/6	33	6,000
R36/6	36	6,000
R39/6	39	6,000
