

Trench Mesh

Made in Australia
Compliant with AS/NZS 4671:2019
Lightweight and flexible
Manufactured from D500L reinforcing mesh
Various widths, 6m lengths

Trench Mesh is a lightweight reinforcing mesh, this makes it easy to work with on the construction site. The Trench Mesh is laid into the trench before the concrete is poured. As a result the footings of the structure are given a significant increase in durability which prevents cracking of the slab.

It can be trimmed on-site using a grinder or bolt cutters.

Stock Sizes

Product Code	Wires	Width (mm)	Weight (kg)	Pack Quantity
NF8TM3	3	200	7	40
NF8TM4	4	300	9	40
NF11TM3	3	200	13	40
NF11TM4	4	300	18	40
NF12TM3	3	200	16	40
