

# Z Cages

Made in Australia

Compliant with:  
AS/NZS 4671:2019  
AS 1554.3.2014\_Amdt1-2017  
AS 2870:2011

Delivered on-site ready for immediate installation

Stackable; easy to transport and store on-site

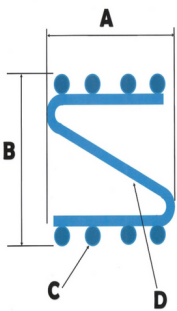

"N" bar cages

6m length

Z Cages are ideal for footings in most residential slabs and many commercial projects. They are welded in the prefabrication process; this produces a stronger structure which decreases the chance of damage during transport to site. Being stackable they are more compact, reducing the overall volume required for delivery.

Z Cages are structurally stronger than Tie Wire cages which have a tendency to warp and bend during handling.

## Stock Sizes

Product Code	Width (A)	Height (B)	Longitudinal (C)	Fitments (D)	Substitute for	Nominal 6m Weight
NZ1222	200mm	200mm	2 x N12 Top & Btm	10 x R10 @ 600crs	-	26.18kg
