

Corner Bars

Made in Australia
Compliant with AS/NZS 4671:2019
Available in stock
Easily fitted on-site
Accelerates construction progress

Corner Bars are pieces of steel reinforcing bar which are used to connect structural sections at right angles. They enable steel work to continue around corners to allow a continuous pour of concrete regardless of the shape of the structure. They are available in a variety of standard sizes and can be cut and bent to a custom specification if required.

Stock Sizes

Product Code	Diameter (mm)	Dimensions (mm)
CBN1255	N 12	500 x 500
CBN1266	N 12	600 x 600
